Coding Languages/Developer Tools: Python, Java, HTML/CSS, Next, Dart, Flask-SQL, Node, Express, RISC-V, C, Verilog, PostgreSQL, Git, Firebase, Docker, Google Cloud Services, Heroku, Vercel, MongoDB, Supabase, Azure Labs

Experience

Carnegie Mellon University REUSE

Pittsburgh, PA

Incoming Computer Science Research Intern

May 2025 – Present

Hack4Impact Cornell

Ithaca, NY

Software Developer on Greenzone

January 2025 – May 2025

- Built a **web-app** to deliver data that secures the livelihoods of **300,000+ herders** and their livestock in Mongolia.
- Engineered **data retrieval and modification** functionalities for map data using **Supabase** and **PostgreSQL**.
- Established robust **API-Routing** from backend to the **Next.js** frontend using **Node.js** and **Express.js**.

Software Developer on OKB-Hope

September 2024 – December 2024

- Developed a **web platform** that connects **10000+ of Ghanaians** to vital mental health resources.
- Implemented user-friendly **interfaces** for the Discover and Psychiatrists pages using **Node.js** and **HTML/ CSS**.
- Constructed and tested multi-file **upload and storage features** by integrating **Firebase** with the **Next.js** frontend.

Workout Hub Website

Remote

Lead Developer

July 2024 – Present

- Designed and developed a **full-stack website** to allow for **any number of users** to store and track their exercises.
- Built the frontend with **React**, the backend with **Node.js/Express**, and used **MongoDB** for data storage.
- Implemented **secure user authentication** using **JWT tokens**, tying accounts to user's email and password.
- **Deployed** the backend via **Heroku** and the frontend via **Vercel** for scalable hosting, accessibility and ease of use

Lost and Found App

Ithaca, NY

Backend Developer

April 2024 – May 2024

- Developed a Lost and Found **IOS Application** in a **team of 4** other students for an app creation competition.
- Designed and implemented the backend using **Flask-SQL** to handle **API-routing** for frontend requests.
- **Deployed** the backend via **Docker** on **Google Cloud Platform** for live accessing, testing and hosting.

Shady Grove Group LLC

Silver Spring, MD

Part-Time Intern

June 2021 – June 2023

- Contributed to an LMS that is used by **100+ at the company** and in Florida University Southeast (FUSE).
- Utilized **Flutter** for frontend and **Firebase** for the deployment, while using an **Agile** development framework.
- Optimized platform **functionality** through **testing** and key document uploads, enhancing usability and reliability.

Extracurriculars

CRU Cornell

Ithaca, NY

Technology Team Lead

August 2023 – Present

- Led the creation of **audio-visual content** for weekly club gatherings attended by **100+ active members**.
- Aided in the **organization and structure** of the weekly club gatherings through weekly leadership meetings.

Silver Spring Village, Inc.

Silver Spring, MD

Volunteer Technology Coach

March 2022 – June 2023

- Provided personalized **technology support** and usage **training** to senior citizens living in my community.
- **Assisted** seniors with the **use of technological devices**, social media applications, and general internet navigation.

Hamlin Fistula Hospital

Addis Ababa, Ethiopia

Assistant Receptionist and Rehabilitation Aid

July 2022 – Aug 2022

- Worked with **managing patient and employee data**, ensuring reliable registration for the **100+** of registrar users.
- Aided the rehabilitation team in **providing skills** and vocational training to women recovering from surgery
